3525 - Pendulum Seat

What is it? It’s a commercial grade pendulum seat with a protective rubber hose which covers a 2m long 8mm chain. The round seat has a 4mm steel insert inside, which is covered in a thick rubber to soften impact.

Seat diameter: 25cm (10 inch)

⚠️ Our pendulum seats have a rubber hose over the chain. Some companies may offer a seat without the hose but the chain on exposed seats can pinch and trap fingers and the skin on legs.
