'I was impressed with the quality of your service from beginning to end: from my first contact with you, through the design and discussion stage, the whole project was managed professionally and in a timely fashion.

The quality of the apparatus and the installation itself is superb and the children love it.'

Mark Clutsom - Head Teacher

The exciting new agility trail we have installed for St. Kew School makes use of a narrow strip of grass beside their car park. The trail includes a Ramp Net Climber, a Drop Rope Traverse, Stepping Logs, a Balance Beam and some Stepping Stilts. The trail gives the added challenge of traversing from one end of the course to the other without stepping down.
