

THE CHALLENGE

We had previously installed a Tractor and Trailer Slide for Trevalgan Touring Park and they got back in touch with some designs they liked along with a wish list for further development of their play area.

During discussions between ourselves and the customer we came up with a design that ticked all the right boxes and fitted the budget.

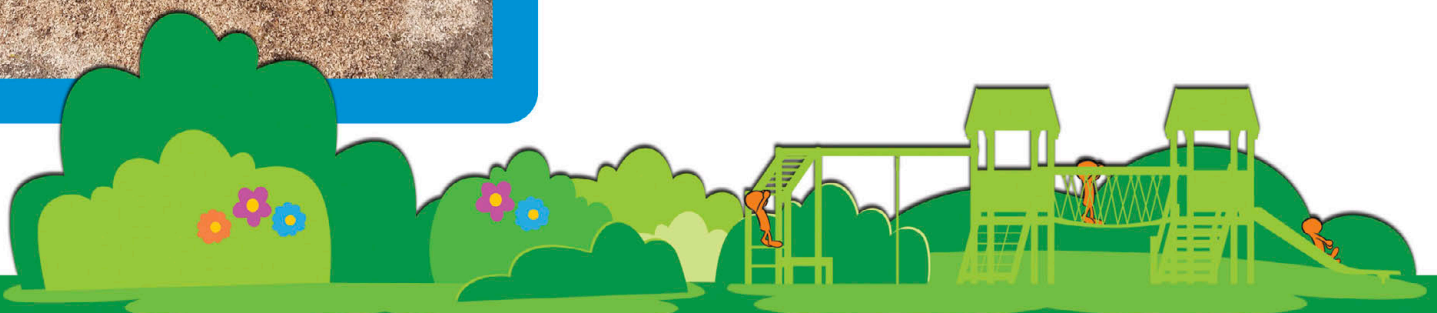

We find the best designs are born out of regular communication and building relationships with our customers, and here's the result...

THE SOLUTION

We combined elements of different boats we had previously constructed and put them all together to create an enormous pirate ship!

Here are just a few comments from Trevalgan's visitors..

"Awesome Playground" "Looks fantastic and great fun"
"Is it for kids only? Looks great!" "Wow!! Looks amazing!!"
